Compare Prices, Print Labels, Track Deliveries And Control Shipping Costs Online

Harness The Power Of Web Hosting

Cloud computing, software as a service, on-demand software

Using different couriers to ship across town, across North America or around the world? Want to instantly compare all delivery services on one screen? Want to find the best option based on price and delivery time? Want to print labels, schedule pickups, track shipments and get real-time status updates all from one secure website? Meet 2Ship. 2Ship leverages the power of web hosting to bring you a complete all-in-one solution that integrates all your shipping activities and accounts into a single platform.

These terms describe the latest in software and application distribution technology. In this model, customers don't have to buy, install, update, maintain, backup or support the shipping software they use. 2Ship removes the IT burden from your business and allows any authorized user with internet access to ship on a secure platform from any location.

Make a real contribution to your bottom line

Ensure that every parcel you ship is at the lowest available price. Because delivery prices, surcharges and fuel surcharges change regularly, you need a system that monitors these changes for you. 2Ship keeps track of all courier service and price changes and then displays them in real time on a single screen, allowing you to make informed decisions for every package you ship.

Instantly compare delivery services and prices across couriers to choose the service that best suits your budget and shipping requirements. Then, print labels and arrange pick-ups, all from one easy-to-use secure website.

Cost effective for small business tool

Because 2Ship is web-based, the cost to access multiple couriers' services is no longer limited to large companies with large budgets. With 2Ship, employees in any organization can easily ship and save money. Once logged in, you'll enjoy all the benefits of the 2Ship platform, including:

- One-click access to all your couriers
- Instant service, price and delivery time comparisons on one screen
- Automatic address validation
- Creation of Customs invoices
- Online filing cabinet that stores all your shipping documentation
- Shipping cost allocation
- Complete control over all user activities across unlimited locations
- Monthly reconciliation service that guarantees your invoices do not include erroneously billed shipments
- No costly hardware or IT support expenses
- No need to pay for keeping you courier service prices up to date

Easy To Navigate

The 2Ship interface is simple to use.

Enter all your shipment information on one screen. There's no need to navigate through additional pages or wait for pages to load or refresh. The layout guides you as you complete shipments and gives you helpful tool tips along the way.

While most users only require basic shipping functionality, some may require more advanced functionality. 2Ship allows you to choose between basic and advanced shipping modes. Basic offers a streamlined shipping screen with fewer options, while the advanced mode offers every shipping option you could ever need.

Allocate and reconcile shipping expenses

2Ship allocates shipping costs, frees your staff from tracking down shipments and prevents unresolved charges. If shippers change cost centres, 2Ship validates it. To ensure your shipping expenses are always accurate, 2Ship runs a monthly reconciliation of all your transactions and shipments.

Take control of your shipping

2Ship is designed to create a centralized shipping environment for businesses of any size.

Whether you have multiple users at the same location or multiple geographic locations processing shipments, 2Ship lets you control all your shipping activities.

It gives authorized users full visibility over transactions, delivery status and costs. Consolidate all your shipping accounts to maximize your savings and easily administer and monitor all users under a single platform.

2Ship

Cost effective to set up and maintain

On average, 2Ship users save 20% on their total shipping costs. Incorrect address fees and returned shipments may add unnecessary or additional costs to your shipping expenses. 2Ship ensures accurate addressing by validating address information before you ship.

Other features, including templates for recurring shipments, on-hold processing and shipment consolidation, all help improve the speed and accuracy of your shipments and reduce operating costs.

Companies typically incur upfront costs to implement new software, including hardware, licensing fees, installation, training, integration, tech support and maintenance. Eliminate these costs by deploying your own 2Ship solution with web-based software that includes upgrades, performance monitoring and ongoing maintenance.

- Automatic service, price and surcharge updates

- A self-administered, scalable, secure shipping platform that can be accessed at endless locations by any number of users

- No additional hardware or IT support required

- No annual courier price change fees

Ship smarter

- Compare all your couriers and services instantly on one screen

- Always select the most cost-effective shipping service

- Use a single address book for all your shipping needs

- Print courier-certified shipping labels from your desktop

- View shipment history for all couriers

- Get real-time tracking updates

- Print real-time shipping reports

- Manage third-party shipments, vendors, customers and returns

Why choose Neopost?

Neopost is a world leader in mailing solutions and a major player in digital communications and shipping services.

Our innovative solutions help guide and support organizations in how they send and receive communications and goods, helping them to better connect with their customers.

In today's world of increased dependence on technology, Neopost believes that one thing remains unchanged: the real engine for success is people. Because it's people who drive business forward. Neopost appreciates and nurtures the human side of business and thinks of its customers as individuals, not as organizations.

We believe in creating partnerships based on trust in order to meet customers' changing needs.
